Data Notes

Data is summarized at the unit level and includes all 200 series controlled hunts and general seasons with a "one bull" or "one elk" bag limit. Data Hunters of multi-unit controlled hunts or general seasons are assigned to a wildlife management unit by mandatory reporting data on which unit they hunted the most.
"Hunters" is the estimated number of people that actually went hunting based on mandatory reporting data. If a hunter drew and/or purchased a tag but never went hunting, they are not included.
"Avg." is a three year average from 2016, 2017, and 2019 data. A mandatory reporting system error in 2018 with some controlled hunts does not allow an accurate comparison between archery and rifle hunts
"Prop" is the proportion of hunters or harvest in the unit that was from any legal weapon (commonly referred to as "rifle" hunts) vs. archery vs. muzzleloader
"Combined Bull Harvest" is the harvest of all male elk (spikes and branch bulls) during hunts with "one bull" or "one elk" bag limits
