Ken provided the Commission with an overview of the agency’s financial status for the period ending October 31, 2025, marking the start of the 2025 - 2027 biennium. The report highlights a total cash balance of \$163.78 million, including \$72.87 million in unrestricted funds and \$90.91 million in restricted funds. The unrestricted cash total includes \$19 million from wildfire insurance proceeds that will be used for damages incurred in the 2020 wildfires. Expenditures thus far in the 25-27 biennium total 12.05% of the agency’s legislatively approved budget limitation. In response to a Legislative Fiscal Office request for all agencies to provide 5% budget reduction options due to projected general and lottery fund shortfalls, ODFW provided options

1 utilizing a multi-faceted strategy involving vacancy savings, service reductions, and adjustments
2 to its 10% reduction list used in 25-27 biennium budget development. The agency will also begin
3 preparations for developing the 2027- 2029 agency request budget soon.

5 This amended rule provides state authorization of sales of yellow perch, bass, walleye,
6 catfish, carp, and northern pikeminnow caught in a new Treaty Indian research fishery in
7 several backwater areas and sloughs of the John Day Pool to reflect recent tribal action
8 to open this fishery.

12 **Species Bag Limit Reduction**

13 Adopted: 10/24/2025 Effective Date: 10/27/2025 through 12/31/2025

14 This rule maintains the three-fish bag limit to keep harvest rates from increasing to
15 reduce the risk of
16 exceeding catch limits for multiple rockfish species. During the Oregon Fish and Wildlife
17 Commission meeting on December 13, 2024, staff cautioned that an in-season bag limit
18 reduction could be necessary based on pre-season models and lower harvest limits for
19 both black rockfish and canary rockfish.

22 **Delay Oregon Commercial Dungeness Crab Season Opening**

32 north of Cape Falcon.

23
24 Lynn provided the Commission with a presentation outlining proposed changes to
25 commercial and recreational groundfish fisheries management in response to reduced federal
26 catch limits for key species like black and canary rockfish. The presentation detailed the public
27 input process, federal and state harvest guidelines, and management measures aimed at
28 balancing conservation with fishing opportunities. For commercial fisheries, strategies include
29 trip limits, gear restrictions, and the proposed permanent suspension of Black Rockfish
30 Management Area trip limits. Recreational measures focus on maintaining year-round access
31 while adjusting bag limits and season structures to stay within harvest guidelines. The
32 presentation also covers updates on permit lotteries, survey efforts to support stock
33 assessments, and projected impacts for 2026, recommending adoption of staff proposals to

15 support fishery management, research, and monitoring, while eliminating the Albacore Landing
16 License. The presentation details the new fee structure, exceptions, and specific rule changes,
17 including repeals and revisions to Oregon Administrative Rules (OARs). It emphasizes the
18 extensive public engagement process, including advisory groups, public hearings, and
19 stakeholder outreach, especially in light of reduced black rockfish catch limits.

38

39 John and Nadine provided the Commission with a presentation on proposed rule
40 amendments that require all commercial fish landing reports be submitted electronically through
41 the Pacific States Marine Fisheries Commission (PSMFC) e-ticket system, replacing paper tickets
42 to improve timeliness, data accuracy, and management efficiency; clarify limited fish seller
43 reporting; remove redundant ad valorem rate language; add definitions (such as “dock receipt”);
44 and establish regulations allowing catcher/processor vessels to land fish in Oregon with
appropriate electronic reporting and weighing provisions. They reviewed the history of electronic

1 reporting, outreach to dealers, current submission levels, and details on how the rule changes
2 would standardize reporting across fisheries, facilitate modernized submission methods
3 (including via mobile devices), and support consistent regulatory compliance for commercial
4 fisheries and catcher/processors operating in Oregon waters.

23 and then brought them to the Commission for approval. The slides highlight specific
24 recommended projects in different regions, such as the Columbia Plateau Habitat Initiative, long-
25 standing public access at the Heppner Regulated Hunt Area, expansion of access at Manulife
26 Access Area NE, and habitat and hunt access improvements in the Southwest region including the
