Comment:

The general public are always hearing from the state departments "we need more money". Why do you possibly think you need to purchase more land? and add to the yearly expenditure of up keep? It does not matter if it is a "good buy" because of how it is purchased, an expenditure is an expenditure. Up keep is an on going expenditure also. Quit spending!

Comment:

As a property owner three parcels west of Don Lindley Park, I support the sale of this property because it is much more valuable to the community as a natural meadow/park than a concrete boat ramp and big paved parking lot. Also bank fishing access is extremely rare and this parcel offers that. Kayakers, picnickers and elk watchers are regular users. It doesn't need to be paved over. Thank you.
